

I would like to comment in protest of LMFM signals being given priority over FM translator service. My favorite radio station K-LOVE is a national broadcast to my city over 91.5 in Seymour, Indiana. Please do not allow residents of this community to lose this broadcast. Prior to K-love the christian radio in our area tried to serve so many different taste of music that you were lucky to hear the type you enjoyed one or two hours per day. Due to commercial appeal we have several country or rock stations in this area but the content promotes values I disagree with. The comment of "if you don't like it, change the channel" would not be applicable to me without K-love. Everyone I know listens and financially supports K-love. Contemporary Christian music is quite popular in our community and is even performed at our church. It has a tremendoud impact on our youth and parents feel good knowing when their children listen to K-love they receive a positive uplifting message. We actually listen to K-love as we travel on vacation by tuning into the various cities that promote their broadcast along the way. And they have NO COMMERCIALS. Please do not make a decision that would cost us our station!

Sincerely, Terry Ann Fish
